**AUG. WALKER,**  
118. NEW BOND ST. W

1928

Subjects on pp. 8-9

~~VULTURES @ p. 8~~

Bush-Cuckoo " - 10

Nest of Wren

~~On p. 10~~

Always come up on catching a  
fish - but ONLY head & neck - so as  
to dispose of head first - but when  
well fed, land on reeds  
& play with prey -  
then crackle !!

Handwritten notes, mostly illegible due to fading. Visible fragments include:  
"Horned"  
"The ..."  
"for ... (animal)"  
"at ... the ..."

Handwritten text at the bottom right, possibly a signature or date, mostly illegible.

SEE NEXT PAGE

Oriel does seem to have a heavy head - heavy for size of body - neck an average length (far less than Addra) - when standing "four square" the quarters are higher than withers - in fairly pronounced "hump" on latter with a dip between it & neck. Legs V. thin

NB - Addra also has heavy head

Little Stunt, K.H. Mus.

Adult? Summer-plumage 27 May.
